

## Southern Windsor Century

**Miles: 101.2**  
**Surface Type: Paved**  
**Elevation Gain: 6,564 ft**  
**Difficulty: Challenging**

The Southern Windsor Century is a 100 mile road ride with a short dirt road section that can be ridden by most bikes. Ridable as either an epic all day sampler of the farms, rivers, covered bridges and historic villages of the area, it can also be broken up into a long weekend leisurely tour. For those looking to ride the route as a weekend tour, Chester and Woodstock make the perfect overnight destinations. Both have historic town centers with restaurants and lodging options. For those tackling the route in a single day, food and amenities are plentiful on the route. For those that would rather sleep beneath the stars, Mt Ascutney State Park, in the Town of Windsor, offers camping as well as other outdoor recreational activities.

## Legend

	Paved Road		Parking
	Gravel Road		Bike Shop
	Paved Bike Route		Food
	Gravel Bike Route		Ice Cream
	Mile Marker		Brewery/Tavern
	Caution - Steep Grade		Swimming Hole
	Rail Road Crossing		Covered Bridge

## Disclaimer

**Notice to Bicyclists:** This map and accompanying information is intended solely to assist bicyclists in their selection of facilities to ride on throughout Windsor County. In providing this information, Southern Windsor County Regional Planning Commission (SWCRPC) does not designate these facilities as formal bikeways. SWCRPC also does not assume liability for bicyclists who choose to travel upon any of the facilities shown on this map, nor does SWCRPC guarantee the stability, condition or fitness of any of the listed facilities for bicycling. Many of the facilities identified on this map cross and/or run on public roads that are exposed to daily wear and tear and degradation due to weather, motorized traffic and other environmental factors. Facilities may contain pavement imperfections, including ruts, cracks, and bumps. Riders may encounter expansion joints, debris, encroaching vegetation, stormwater inlets, and other natural and man-made features. Riders should also remain alert for areas of visual impairment and other irregularities that may impact rider and motorist ability to see each other or potential road hazards. The chance that one may come into an area of visual impairment or a route irregularity warrants special care on the part of route users. This map includes facilities within multiple jurisdictions. Conditions and design elements may vary between jurisdictions.

It is the responsibility of the individual rider to remain alert at all times as to the conditions of the facility, pedestrian and other traffic on the facility, and the inherent potential for conflict in any shared-use space. Riders should always ride with care for their own safety as well as the safety of all other users of the facility or right-of-way.
